# WH CORPORATE STATEMENTS

## Our vision

“Western Hospital aims to be the provider of high-quality patient-focused healthcare especially renal care that is readily accessible, Value for money and meets the needs of the communities we serve”

## Our Mission

At Western Hospital we strive to build on the hospital's history of competence, excellence and leadership in renal medicine to be the quality leader for building the finest total renal medical solution to our international and local communities we serve.

In addition we will continue to improve our multi-specialty healthcare delivery model to be at the forefront of innovative and quality conscious patient care in order to build a healthier tomorrow.

## Our Promise

At Western Hospital we are absolutely committed to making a difference to our patients lives, and we aim to accomplish this through the provision of high quality healthcare in modern and well equipped medical units in our head office and through our JV partners throughout the Island.

We want to be trusted to look after your loved ones and will focus on prevention and education as much as curing illness, as we firmly believe that prevention is always better than cure.

# WELCOME TO WESTERN HOSPITAL

## Your Health ! Our Mission !

Western Hospital is a healthcare institution with over 30 years of experience in Sri Lanka. Renowned for having the longest standing Hemodialysis(HD) and Kidney Transplantation (KT) Programs in Sri Lanka and is a well respected brand in the region, we pride ourselves on our dedicated humane approach to our patients with our excellent and reliable kidney care.

We have continued to be an integrated healthcare provider that has been successfully established to provide safe and affordable healthcare to low to middle income groups as well as premium, high quality healthcare groups to more affluent communities.

We undertook the 1st Kidney Transplant in Sri Lanka

We are the 1st Dialysis Program in Sri Lanka

We are the 1st Specialty Hospital in the Private Sector

# WELCOME TO WESTERN HOSPITAL

Our variety of healthcare services allows us to provide current solutions for current healthcare issues faced by communities in Sri Lanka and beyond.

We have diversified into a General Hospital now, and also provide a variety of services such as OPD, Mobile Services, Emergency Care, Channeled Consultations, Pharmacy Services, Inward Services, ICUs, Maternity care, Dental Services, Laboratory Tests, Imaging Services, Clinical Diagnostic Tests and more.

Western Hospital has shown sustainable growth over the years with collaborations and JV's set up islandwide, including a Dialysis partnership with Hospitals in Kalutara, Jaffna, Ruhuna, Ratnapura and other partner alliances to tackle the burden of Kidney disease in Sri Lanka.

Soon we will be diversifying in to a variety of services including, Lithotripsy, Urology, Geriatrics, Health Education, Laboratory collection centers and Dialysis units islandwide.

Our intention is to become a highly efficient and well oiled healthcare institution of choice for investors & partners, healthcare professionals and most importantly for the people of Sri Lanka and the world. We value and encourage quality based business and support positive behavior through effective leadership, sound business acumen and healthcare expertise, preferring to lead by example. At Western Hospital, we'll continuously strive to command high quality standards throughout all of our healthcare operators and teams, supporting ethical behavior and clinical excellence through strong leadership and the gradual adoption to internationally accredited quality standards.

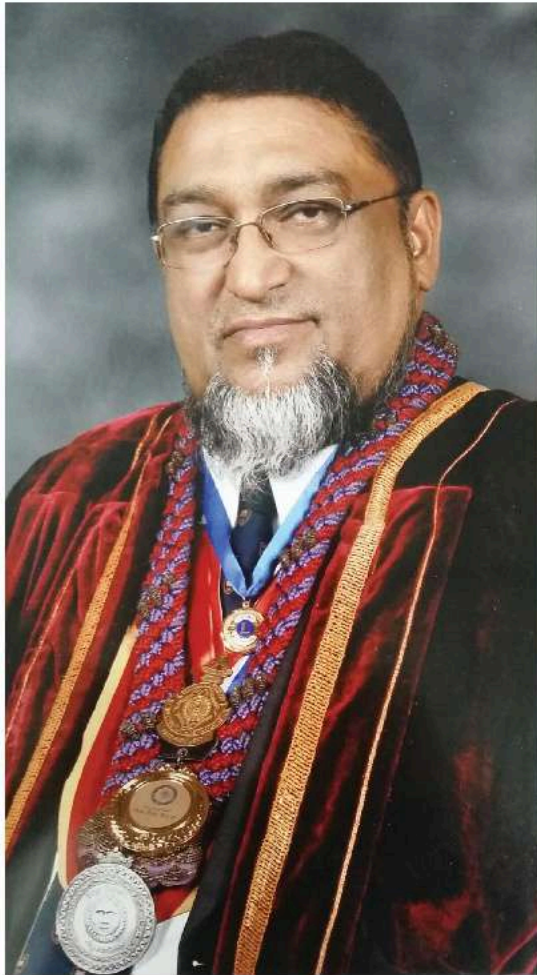

Our Great Chairman leading by Example

# CHAIRMAN'S MESSAGE

As the founder of WH and the pioneer in kidney transplantation and dialysis, I believe that we have come a long way in building a great team and attracting impressive clinical partners who have spent their careers to address the growing problem of kidney related diseases and the need for dialysis and kidney transplantation in Sri Lanka. By continually building on our competence, excellence, leadership and network today we have grown to be the leader in this area.

We have recently diversified to a multi-specialty healthcare delivery model with obstetrics, mother and childcare facilities and dentistry as a new part of our service portfolio.

We continually hope that we can further expand our facilities and services to include new car parks, urology suits, new chennelling centers and international accreditation in order to provide a quality service offering to our patients.

In 2018, we will be collaborating with new hospitals, clinics, diagnostic centres, business partners and will continue our momentum as a fast growing hospital in Sri Lanka.

## Vidyajyothi Professor Rezvi Sheriff

Founder and Chairman

Councilor for the International Society of Nephrology (ISN)

The Father of Nephrology in Sri Lanka

With years of experience, expertise, competence and knowhow, WH is confident of maintaining its leadership in the region for kidney disease and hemodialysis, while being an active challenger in other areas of specialization in the healthcare industry given the clinical teams it continues to attract.

As the founder of WH and the pioneer in kidney transplantation and dialysis, I believe that we have come a long way in building a great team and attracting impressive clinical partners, doctors and partner hospitals who have spent their careers to address the growing problem of kidney related diseases and the need for dialysis and kidney transplantation in Sri Lanka.

By continually building on our hospitals history of competence, excellence, leadership and network; today we have grown to be a leader in this area both locally and even internationally through our medical tourism channels. Together, we continue to build off these foundations to provide the latest equipment, technology and healthcare facilities for detecting and curing diseases, while providing guidance and preventive support to ensure that our patients can live their life to the fullest.

# A MESSAGE FROM THE CEO

**Mr. Omar Sheriff**

CEO Western Hospital

B.Com (Monash University)

MSC Health Administration (AeU University)

MBA Finance (Asia Pacific University)

The ability to seek preventive and acute medical services is essential for a healthy and growing community. We pride ourselves in being a quality leader in our core and non core service lines. To achieve this Western will provide its stakeholders with quality healthcare operations management, state of the art equipment, and affordable but value added services.

At the heart of Western Hospital Healthcare however, we have a strong desire to demonstrate effective healthcare management as it is the basis for quality leadership. We will accomplish this by demonstrating consistent business acumen, respecting fellow healthcare professionals, Doctors, nurses and support staff as well as understanding the needs of patients.

Our operational healthcare teams are supported through the implementation of modern innovative technology and efficient IT solutions. We have an efficient healthcare information system with the ability to provide accurate, up to date and complete information about patients at the point of care, while also helping providers more effectively diagnose patients, reduce medical errors and provide safer care. We will continue to innovate to make our patients have a world class service for a reasonable cost.

At present, We have the right staff, people, expertise and the soft human touch to make an outstanding patient care experience at Western Hospital. As industry dynamics change we have to keep improving. Therefore Western is presently supporting innovation and re-vamping our systems and process to comply with internationally accredited standards such as ISO, JCI or other recognized international accreditation bodies.

However we know we will always encounter risks. Therefore to keep us safe from a variety of risks our company will continue mitigate risks by diversifying in to more profitable channels of business and upgrading our current service lines to provide more quality services for our stakeholders.

A stylized signature of Omar Sheriff in black ink.

**Omar Sheriff**  
Chief Executive Officer

# OUR TEAM AT WESTERN HOSPITAL

Western Hospital is very proud of the high calibre team of professionals lead by the Father of Nephrology Professor Rezvi Sheriff and the rest of the team of consultants, surgeons, nurses, laboratory personnel and other specialist staff who are resolute in their commitment to providing quality management services to our healthcare stakeholders both locally and internationally especially in renal and general medicine. With our expertise and understanding of the diverse, multi-cultural society through out the SAARC region, we can guide and demonstrate how to work effectively and profitably in a culturally sensitive environment, securing patient loyalty and building mutual respect.

With such a formidable spread of expertise within the group, Western Hospitals healthcare services are more than able to deliver efficient and effective solutions for partners, investors and for the greater communities it serves.

# OPERATIONAL IMPROVEMENTS OF WH 2017/2018

Western Hospital has always provided a quality conscious patient focused service and our patients numbers have reflected that confidence and sentiment with rises in patient numbers in most service centers. The total monthly average utilization of all services in Western Hospital has increased by 40% year on year from approximately 2,678 to 3,754 in the period 2017/2018.

# WH SERVICE OFFERING

# TYPES OF SERVICES

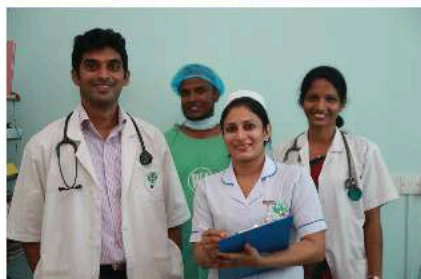

And More.....

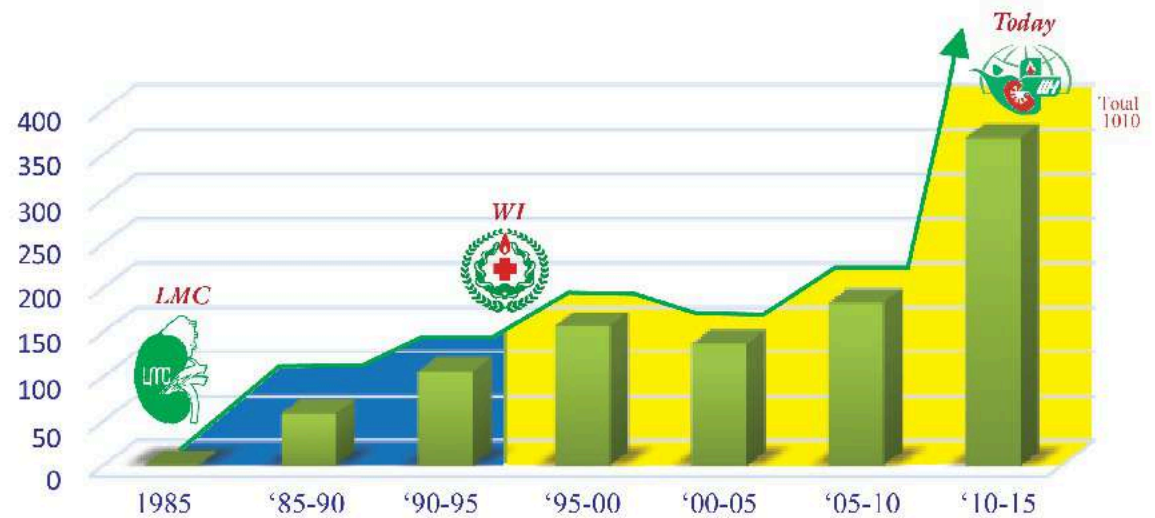

Your Best Kidney Transplant Solution

# MAINTAINING LEADERSHIP IN KT AND DIALYSIS FOR OVER 30 YEARS

## KIDNEY TRANSPLANTS EVERY 5 YEARS

In 1985, Lanka Medicare company started a private-public partnership with the Faculty of Medicine, University of Colombo and Sri Lanka's 1st ever Kidney Transplant was performed on the 5th of October 1985 with a team of Surgeons from the University of Colombo. Lanka Medicare became Western Infirmary in 1995 making us the pioneers in Kidney Transplantation and Dialysis in Sri Lanka

During the last 30 years Lanka Medicare company became WH and by 2015, The company had conducted more than a 1000 transplants and over 100,000 dialysis cases maintaining its position as a leading force in Kidney Transplantation and Hemodialysis in Sri Lanka. Many foreign patients have enjoyed WH services and has been an integral component in making the KT program the most successful medical tourism program in Sri Lanka.

# KT PROGRAM

We are pioneers in this trade and have a dedicated team to provide an end to end transplant solution complemented by a well experienced & qualified staff. We are running an ethical kidney transplant program for more than 30 years with expert teams which consists of several Surgical teams include Dr. Lalitha Piyarisi, Dr. K Umashanker and Dr. Ranjuka Ubayasiri , Senior Nephrologist Prof. Rezvi Sheriff , Nephrologist Dr. Sanjaya Heiyanthuduwa, Anaesthetists paramedical staff,nurses doctors,other coordinating and supporting staff to provide a world class service experience exceeding patient satisfaction levels while saving lives. (i.e Our KT Success Rate Exceeds 98% Over 30 Years)

In addition WH is well equipped with state of the art operating theater, medical diagnostics technology, laboratories and Sri Lanka's largest post transplant ICU unit to help build on its legacy in transplantation for years to come.

## Our Transplants follow a Strict protocol. Where Patient parties experiences

- Recipient & Donor Registration ( Recipient & Donor should be from same country & same nationality )
- The recipient work up & Donor work up (Stage I, Stage II, Stage III )
- Opinions form Consultant Nephrologists for further management
- A comprehensive education on the transplantation process for both the recipient & the donor. So both parties are well educated and aware of the KT program in our organization.
- A transparent legal process which starts with an Authorization Committee
- After getting committee approval all documents are sent to the Health Ministry to get the approval.
- A Transplant with high patient safety standards in a comfortable environment
- A program that is conversant with the transplantation of Human Tissues Act 1987.
- Relationship management with patient on the long run where medical condition is periodically assesed until the patient has recovered fully.

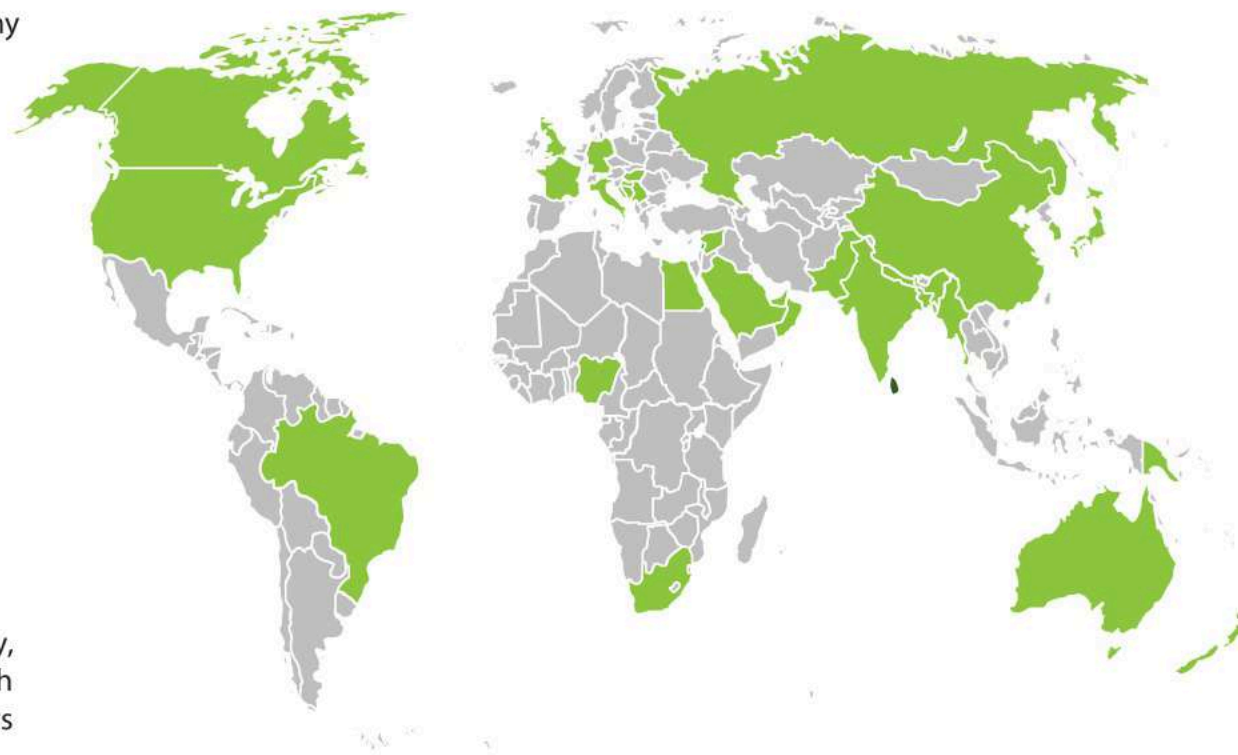

# WH'S RENAL SERVICES ARE TRUSTED BY PATIENTS FROM **AROUND THE WORLD**

WH still remains a effective and trusted solution for many patients in Sri Lanka and beyond. We have undertaken patients from:

- USA
- UK
- Canada
- India
- Maldives
- Taiwan
- Norway
- China
- France

(To name a few in to our KT, HD and other programs advertised around the globe)

Furthermore given the hospital focus on patient safety, it's 98% success rate in KT and being a cost effective high value for money KT proposition we expect more patients arrivals in the future.

■ Origin Country of the Patients visited WH for KT,HD or other services

SL Largest:  
-Post Transplant ICU

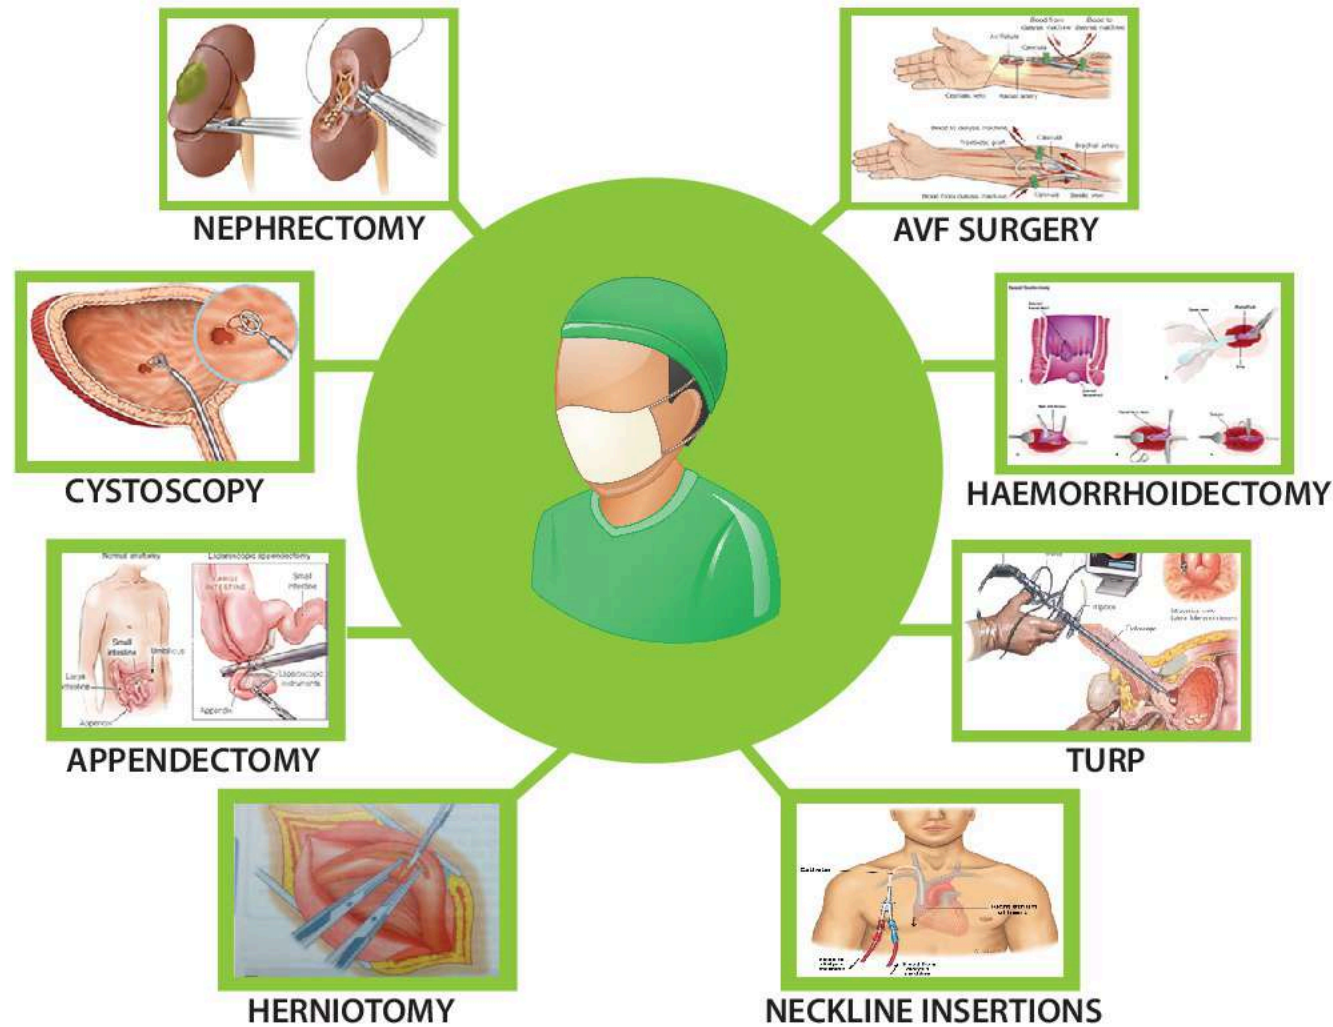

Sri Lanka's Largest Post Transplant KT ICU

Operating theaters for both major and minor surgeries

# TYPES OF SURGERIES

# WH SURGERIES AND POST SURGICAL CARE

WH is equipped with operating theaters with facilities related to post transplantation care and emergency treatment. Patient safety infection control and continuous patient management makes WH surgical services a trusted choice

## Post Transplant ICU

Sri Lanka's largest type of facility for post transplant care is at WH. Post transplant surgery patients are put in this facility, which is a hygienically safe environment with specialized doctors and nurses continuously monitoring patient activity and always on call if any emergency occurs.

## Medical Intensive Care Unit (MICU)

MICU provides acute care for wide variety of complex health problems including

- Lung problems
- Kidney problems
- Liver problems
- Gastrointestinal problems
- Diseases of the blood
- Cancer problems
- Blood infections

The multidisciplinary staff is highly collaborative and supportive, working together to achieve the best patient outcomes possible in an emergency.

MICU Beds in Need for an emergency

Sri Lanka's Longest Standing Dialysis Program

# DIALYSIS PROGRAM

Western Hospital has the longest running dialysis unit in Sri Lanka, and has conducted over 120,000 dialyses for over 30 years under expert management. Dialysis is the most common treatment for kidney failure and is a vital life saving treatment for patients with End Stage Kidney Disease who have lost kidney function. Dialysis helps extend the life of kidney patients by removing waste and excess fluid from the blood, and is regarded as a holding measure until a kidney transplant can be performed.

WH offer flexible dialysis plans to suit your budget and also conduct preliminary investigations for kidney transplants. Care is provided by a seasoned team of professionals including nephrologists, nurses, technicians and support staff on a 24 hour basis. We provide both adult and paediatric dialysis methods including:

## Hemodialysis services for locals :-

Hemodialysis is the most common form of dialysis done for locals; it helps filter waste and excess fluid by circulating blood outside the body through a dialysis machine, which is an external filter that acts like an artificial kidney.

## Holiday Dialysis for foreigners

Being a dialysis patient does not mean the end of travelling abroad and holidays. Western Hospital provides holiday dialysis for patients from all over the world who are visiting Sri Lanka and require dialysis. We provide a comfortable, clean and safe environment for reliable holiday dialysis, and use only board certified nephrologists (kidney specialists) to supervise dialysis procedures

## Continuous Ambulatory Peritoneal Dialysis (CAPD)

WH also arranges Continuous Ambulatory Peritoneal Dialysis (CAPD) services on request. CAPD can be done in the comfort of your own home, and does not require an external machine to filter your blood.

# WH HD AND JOINT VENTURE(JV) PARTNERSHIPS ARE GROWING ISLAND-WIDE

Our Center at WH Consist of :

- Modern Dialysis Machines
- Electric reclining Dialysis chairs
- Private Rooms for clients who require privacy or whose conditions require isolation
- Treatment room for minor surgeries
- TV's and other ancillary facilities
- 24/7 Care by seasoned professionals
- On call emergency and mobile services

WH HD program is available for patients island wide via our affiliate JV Centers located in:

- Ruhuna- WH-Ruhuna Hospital Dialysis JV partnership
- Kalutara- WH-Phillips Hospital Dialysis JV Partnership
- Jaffna- WH- Northern Central Hospital Dialysis JV Partnership

In addition WH is establishing a variety of other JV projects in key CKDU prevalent areas in Sri Lanka.

Our dialysis units offer high quality dialysis in a friendly and relaxed environment, and provides a timely, smooth and safe service. Our dialysis includes initial screening by our expert nephrologists, blood screening tests, insertion of AV Fistula for hemodialysis, followed by dialysis.

# WHY DIALYSE WITH WESTERN HOSPITAL

Longest Running Dialysis Program In The Country

Largest Private Dialysis Network That Is Expanding

Cost Effective Dialysis Services

WH is equipped with luxury and Standard Ambulances in fleet to cater to all market segments

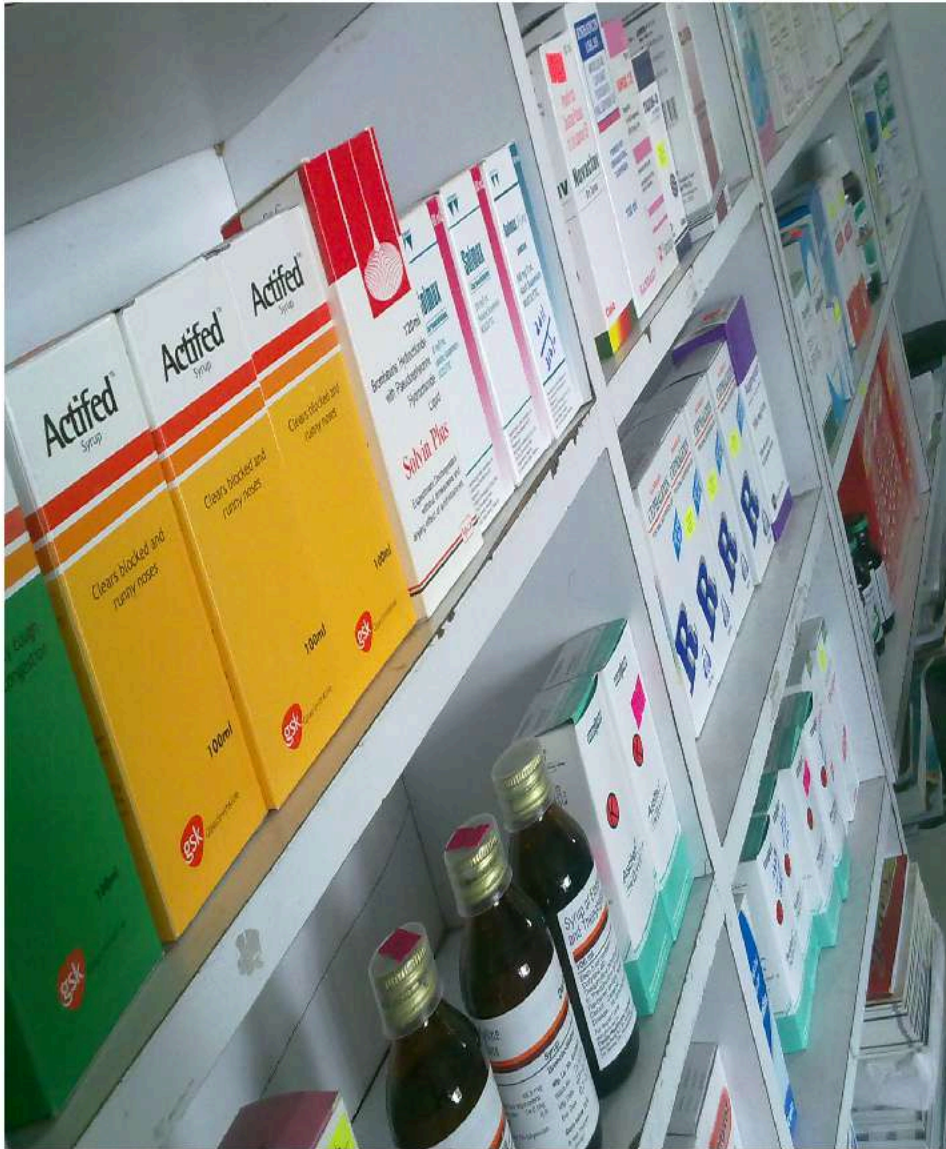

A night pharmacy open till midnight !

# WH PHARMACY SERVICES

Western Hospital Pharmacy provides a comprehensive selection of high quality, government approved medications for all your needs, and we strive to provide our patients accurate, timely and professional provision of prescription services. Our pharmacy is located on the 2nd floor, and we are ready to serve you every day until midnight.

## Various OTC and specialist medications available

We stock a comprehensive selection of over the counter (OTC) and specialist medications, ensuring that all your needs are catered to in a convenient manner.

We provide medication to facilitate all medical and surgical requirements of patients, including outpatients and prescriptions from elsewhere. We also provide surgical devices, orthopedic support accessories, nutraceutical products, health supplements, baby and mother care products and portable diagnostic devices such as Glucometers etc.

## Your safety is important to us

Our qualified and experienced pharmacy team is efficient and always willing to provide you with any information with regard to your medicine. Prescriptions are checked by qualified and registered pharmacists and dedicated support staff before dispensing drugs to patients, ensuring your safety. All our products are government approved registered drugs sold at Government approved prices, and we store our products according to proper guidelines

## Bulk Orders and Free Delivery

We are happy to undertake bulk orders of medication, and offer free delivery for pharmacy purchases over Rs.. 5000/- for patients in Borella, Nawala, Rajagiriya, Dematagoda and Wellawatte. We accept cash and card payments at our pharmacy.

Your Hospital with Cutting Edge Diagnostics

# WESTERN HOSPITAL **LABORATORY SERVICES**

Western Hospital's laboratory is headed by an academic Pathologist, and run by efficient staff with over a decade of experience. Our laboratory professionals work closely with the medical staff at Western Hospital to provide excellent anatomic and clinical pathology services to both hospitalized patients and outpatients. Our laboratory services are a vital component of quick and accurate diagnosis, and subsequent treatment.

We are fully equipped to conduct a wide range of laboratory investigations that are important for patient care, such as routine blood, urine and other tests according to the needs of patients and consultants, which are carried out in a timely manner. We use reliable automated computerized analysers to conduct majority of our tests, and place great importance in accuracy, precision, efficiency and speedy reporting, while ensuring high standards. Our general laboratory is open until 8 pm daily; however laboratory tests are available 24/7 for on call emergencies.

## **Routine Laboratory Tests**

We offer several medical tests for the following categories: General Pathology; Haematology (Basic, Special and Coagulation Tests); Urine Analysis; Stool/Semen Analysis; Staining tests, Diabetology/Endocrinology; Hepatology (liver function); Nephrology (kidney function); Lipids (cholesterol); Biochemistry; Serology & Immunology, Microbiology and Histopathology. We provide both qualitative and quantitative analysis of several samples including blood, serum, urine, stool, semen and tissues.

## **Specialized Laboratory Tests**

We collaborate with ISO accredited hospital laboratories such as Asiri Labs and Nawaloka Metropolis, to provide a wide range of highly specialized diagnostic services, and also work with Genetech Sri Lanka for a range of Molecular Biology diagnostics. In addition, we send special tests that are not available in Sri Lanka to accredited laboratories in India.

Comprehensive Elderly Care Services

# WH GERIATRIC SERVICES

## Geriatric Medicine at WH

Older people are unique. Their issues are different. More time and attention are needed to recognise their issues and also to understand their wishes and dreams in life. Their medical issues also take longer to get better. Elderly care at WH caters for these needs and is a trusted choice for patients who are immobile, terminally ill or just severely elderly

### WH Services caters to elders who :

- Suffers with many medical issues
- Has many diseases seen by many specialists without coordination
- Takes a high dose of prescribed medications
- Has had many falls or stumbles
- Balance is poor
- Struggle to walk
- Struggles to maintain independence and get on with day by day activities of his life for any reason
- Requires rehabilitation needs
- Memory is fading or feel confused at times
- Feels low in your mood or feel anxious or panic easily
- Whose hearing or vision is fading
- Struggles to eat for any reason including having poor teeth
- Struggles to control his bowel or bladder functions
- Are constipated or suffer with unexplained abdominal pain, vomiting, loss of appetite or repeated urine infections
- Has troubling or distressing symptoms interfering with his life and sleep
- Feels frail, very weak and feeble
- Are nursing home resident needing medical attention

# WH GERIATRIC SERVICES INCLUDE:

# IMAGING SERVICES

## Digital X-Ray Services

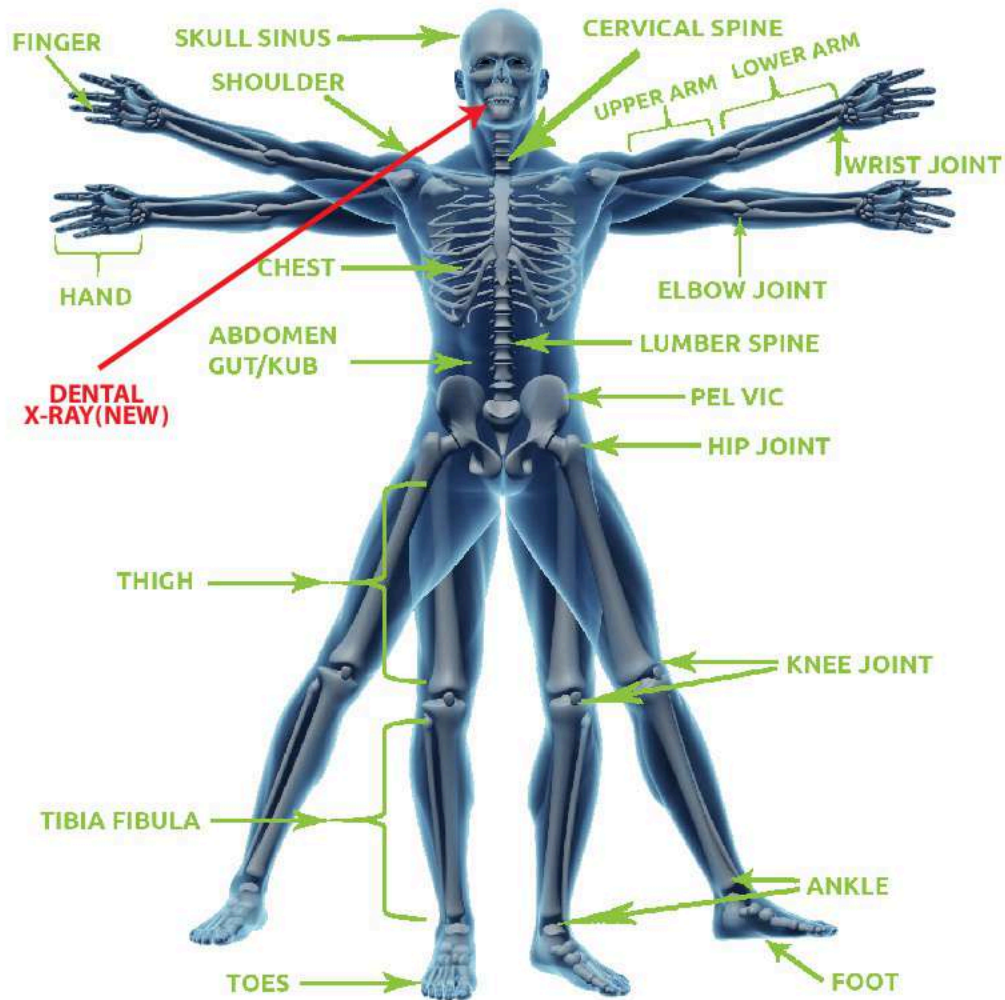

We provide a 24 hour radiography service for general X-rays, which covers a comprehensive range of basic X-rays including dental x-rays. Our X-ray unit is well equipped with digital technology with experienced and highly trained radiographers taking your x-ray. We also provide specialized x-rays such as intravenous pyelogram (IVP) X-rays, which is an X-ray test that provides pictures of the entire body including kidneys and other components of the urinary tract. Recently we acquired the latest digital dental x ray technology and will continue to grow our imaging capabilities.

## Digital Ultrasound and Doppler Service

Ultrasound scanning, also known as sonography, is a non-invasive medical imaging test that uses high-frequency sound waves to obtain 3D/4D images of organs and structures within the body. This method does not use radiation, and can be used in obstetrics. We also provide Doppler Scanning, which can be used to determine how blood flows through your vessels, and helps doctors study major blood vessels for clots or plaque and evaluate blood flow in the heart, kidneys and limbs. Recently we acquired a new 4D Doppler capable of undertaking a variety of scans including unborn babies.

# IMAGING FOR ALL BODY PARTS

## Type of X-Ray's

## Type Scans

Kidney

Bladder

Liver

Fetal (Unborn Child)

And More.....

Gallbladder, Pancreas,  
Scrotum, Uterus, Ovaries

# TYPES OF CLINICAL DIAGNOSTIC FACILITIES

## CABP

This test is useful for doctors to understand how your blood pressure changes through the day and since blood pressure is linked to several different conditions in the body, including kidney function and heart function, this test is important for patients with high blood pressure.

## SPIROMETRY

This is a common test to determine lung function, and is used to diagnose and assess conditions that affect breathing such as asthma, pulmonary fibrosis, cystic fibrosis, chronic bronchitis, emphysema and chronic obstructive pulmonary disease (COPD).

## BIOIMPEDENCE

This is a useful non-invasive test to determine kidney function, which is accurate and painless. This is a convenient, safe and practical test that can be used to gauge creatinine clearance from the body, and gives a more accurate method of determining kidney function.

## UROFLOWMETRY

This is a simple test that is used to determine the flow rate of urine over time. It is a non-invasive test that is useful to assess bladder and sphincter function and how well your urinary tract functions.

A Range of Dental Services

# DENTAL CLINIC

Western Dental Clinic provides a wide range of services to keep your teeth healthy and open up that bright smile. Our pristine dental facility will not only house state-of-the-art technology and a first-class medical team, but our progressive outlook will keep us striving for improvement, where our patients and their needs are an integral component in the dental service.

Education and Training

# WESTERN INSTITUTE FOR PROFESSIONAL DEVELOPMENT(WIPD)

In Today's Healthcare environment, Nurses have a pivotal Role to play as part of a multi professional team, Caring for a diverse range of patients and working in a wide variety of specialist areas. They are the backbone for improved healthcare standards and quality of care in a hospital.

To continuously improve quality in standards of nursing and develop visionary nurse leaders the WIPD was created with a specialist nursing course.

## What Nurses Learn :

Fundamentals of Nursing	Pharmacology
Introductory Psychology	Pathology
Anatomy and Physiology	Elementary Science
History and Trends in Nursing	Medical Surgical Nursing
Nursing Ethics and Professional - adjustment	Psychiatric Nursing
Microbiology	Maternal & Child Health Nursing
Sociology	Family Planning
Community Health	Elements of Ward Managements
Nutrition	English
	IT

## The WIPD Provides

- |                                  |                          |
|----------------------------------|--------------------------|
| - NAITA and MOH Approved Courses | - Nursing Accommodation  |
| - Lecture Rooms with OHP         | - Nursing Library        |
| - Student Class Rooms            | - Demonstration Rooms    |
| - Computer Training Center       | - Group Discussion Rooms |

The Nursing course has been designed to give high level skills, Not just in terms of the physical work but also sharpening creativity critical judgement and ability to lead making visionary Nurse Leaders.

Chairman of the WIPD is also our Chairman & Medical Director Vidyajyothi Prof. Rezvi Sheriff, a learned professor who has a household name in the country as a great academic. He is an emeritus Professor of Medicine in the prestigious Faculty of Medicine of University of Colombo.

In addition we conduct many short training courses on specific topics by arranging experts from the relevant fields as resource persons.

We are also a recognized institution to train registrar level doctors for post-graduate training in Dialysis and Transplantation. All these work is done under the guidance and personal supervision of our Chairman. Our aim is to improve the quality of our training programs to its highest to pass on the required knowledge to the participants.

## Our current Members of the WIPD are

- 1.Prof. Rezvi Sheriff - Chairman & Professor of Training &Studies
- 1.Mr. WijayaRansi - Director of Nursing Program
2. Dr. Rikaz Sheriff - Director of Studies
3. Mr. Omar Sheriff - Director of Marketing
4. Ms. AmithaKathriarachchi -Director of Admin &Coordinator – Training
- 5.Dr. Habeeba Sheriff -Director - Examinations
- 6.Matron Indra de Silva - Principal of Nursing School
- 7.Ms. Fathima Rizmina - Secretary

We also have a faculty consisting of Visiting Specialists in different specialities.

## The institute expects to diversity in to more areas of study including:

Nurse Aides, Care givers, Physiotherapy, Geriatric Nursing, Dialysis Nursing, Surgical Nursing, Travel Nurse, ICU Nurse and many other courses in the future

# BUSINESS MARKETING & IT DEPARTMENT

The Business, Marketing and IT department plays an important role of being the catalyst for change and development of Western Hospital. The improvement of WH services over the last year has improved with the help of this department.

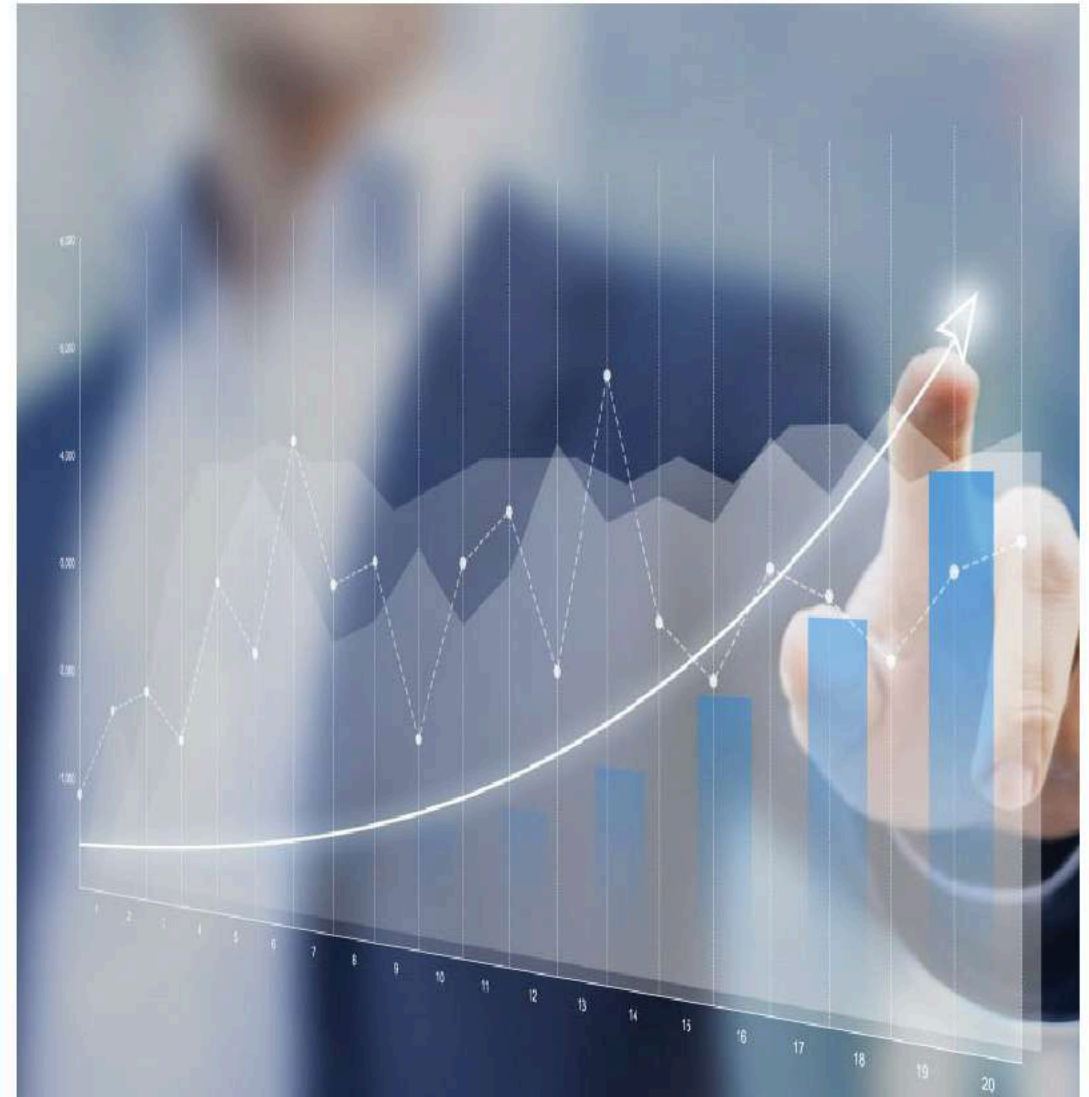

The BMIT is involved in various services such as ;

- Business initiatives
- Hospital IT Systems Development
- CSR Programmes
- Corporate tie ups
- New facility establishments
- Marketing and Advertising
- New Innovations in Healthcare for Hospitals
- Screening Clinics
  - Corporates
  - CSR initiatives
